Lets All Do Our Part

Our business, along with many other industries, is being greatly affected by conditions that exist not only in this country, but the world at large. We are unable, from day to day, to anticipate the future. However plans will be made and will be completed; there will be a great deal of satisfaction in having "carried on."

You can assure yourself a measure of this satisfaction by planting a home garden. The investment in good seeds is small; the dividends large. A kitchen garden will supply quantities of fresh vegetables, and a flower garden will afford pleasure, and interest in abundance.

There is something about growing plants that cannot fail to put faith and renewed hope into the heart and mind. Besides providing a profitable recreation, there is nothing that can compare with the cheery beauty of a well-planned, well-cared-for garden of flowers and vegetables.

To assist you in making your selections we have listed some collections of seeds on page 11.

REDS

American Beauty

101 Large, bright crimson. Is still the most popular hardy Rose.

Ami Quinard

102 Very deep crimson, almost black. This is a new variety and extra good. Fragrant.

Christopher Stone

103 One of the best red Roses; velvety textured crimson; pleasing fragrance.

Etoile de Hollande

104 Brilliant velvety red flowers on long, strong stems. Very fragrant. Now considered one of the best reds.

E. G. Hill

105 The long buds produce double dazzling scarlet flowers, shading to a deep scarlet.

Grenoble

106 Large, beautifully shaped, long-stemmed crimson buds, opening to a striking scarlet-crimson.

McGredy's Scarlet

107 This favorite is vivid rose-red with a blazing scarlet sheen. Flowers are abundant on vigorous, healthy plants.

Red Talisman

108 Cerise-red blending into yellow at base. Large, double.

Southport

109 Brilliant, unfading scarlet with full, cupped flowers. Very fragrant.

PINKS

Briarcliff

110 Beautifully shaped blooms of silvery rose-pink. Excellent for cutting.

Dame Edith Helen

111 Produce immense size soft pink flowers, sweet scented.

We Invite You to Select Your Roses in Our Nursery Basement

Edith Nellie Perkins

112 Beautiful double flowers of soft salmon-pink inside and deep coppery rose on outer surface.

Editor McFarland

113 Beautiful brilliant pink. Its beauty and merit are in its artistic buds on long stems for cutting.

Pink Dawn

114 Perfectly formed, pink buds touched with salmon rose.

Los Angeles

115 A double, luminous coral-pink Rose, toned gold at base.

Picture

116 Velvety clear rose-pink with undertones of salmon. Very double.

The Doctor

117 Large, beautiful buds opening to enormous, cupped flowers of satiny pink. Fragrant.

YELLOW**Golden Rapture**

118 Beautifully formed buds, fully double blooms of rich yellow; vigorous grower.

Joanna Hill

119 Very double, deep yellow, shaded bronzy pink in center.

McGredy's Yellow

120 Light Buttercup-yellow, open flower cup-shaped.

Mrs. E. P. Thom

121 A thoroughly tested, pure, unfading yellow Rose. One of the best garden yellows.

Mrs. Pierre S. du Pont

122 The long bud is reddish gold, opening to deep golden yellow. Very prolific bloomer and fragrant.

Sister Therese

123 Cupped flowers of golden yellow, with edges spotted carmine. Sweetbrier fragrance.

Sunkist

124 A sport of Joanna Hill with very pleasing orange-copper flowers. Buds slightly larger than parent, more petals.

WHITE**Caledonia**

125 One of the best White Roses. Full double and high centered. Continuous bloomer.

Kaiserin Augusta Victoria

126 Soft pearly white with a tint of lemon in center.

McGredy's Ivory

127 Large, well shaped, creamy white Rose. Fragrant.

Mme. Jules Bouche

128 Large, double white with blush tints in the center.

TWO TONED BLOSSOM VARIETIES**Autumn**

129 Has some resemblance to the Talisman. The coloring is burnt orange streaked with red. Double and fragrant.

Condesa de Sastago

130 A brilliantly colored Rose, fiery copper inside the petals, golden yellow on the reverse. The flowers are large and fragrant. Unusually hardy and free bloomer.

Duquesa de Penaranda

131 Beautiful apricot-orange and pink. Vigorous; profuse.

Mme. Joseph Perraud

132 High-centered, perfectly formed flowers that shade from shell-pink to buff and orange in the center.

President Herbert Hoover

133 A charming combination of cerise-pink, scarlet and yellow, not in other Roses. Very fragrant.

Talisman

134 Flowers a wonderful combination of coloring, having gold, apricot, yellow, and old rose, all in one.

About Guarantee and Replacement—So much depends on the care in protecting the roots from exposure, delay in planting, careless planting, unfavorable weather conditions, that consideration on purchaser's part will show that to replace all losses is injustice to us. Thus when there is an actual loss we replace at **Half Price**. Cultural leaflet free upon request.

Hardy Climbing VINES

Plant vines in assortment; they all blend wonderfully and as they flower at different times the effect is continuous.

There are many places around every home where vines can be used with satisfaction—on arbors, trellises, fences, stumps, etc. Do not overlook their importance.

Complete Stock in Our Nursery Basement During April and May

Ampelopsis

261 Engelmanni—Clinging Ivy. Is very quick-growing. Its glossy, light green foliage clings to brick, stone or wood, changing to a beautiful crimson in fall. Usually free from insects. The first year it seldom shows tendency to cling; after then it clings perfectly. Each 50c; by mail 75c. 3 for \$1.35; by mail \$1.65.

Ampelopsis

262 Veitchi—Boston Ivy. A very popular climber for covering brick, stone or wooden walls, trees, etc. Clings without artificial fastening. Each 70c; by mail 95c. 3 for \$1.95; by mail \$2.20.

Bignonia

263 Radicans—Trumpet Vine. A vigorous climber with trumpet-shaped crimson-orange flowers. It clings to walls. Each 60c; by mail 85c.

Bittersweet

264 An old popular climber with glossy foliage and large clusters of orange-crimson berries that remain all winter. Berries are much admired for winter indoor decoration. To produce berries, two plants should be planted so flowers may become cross pollenized. Each 70c; by mail 95c.

Clematis

Large Flowering. No other climbing plant equals in attractiveness these beautiful large-flowering Clematis. They need rich, deep soil, perfect drainage, though abundance of water. Their requirements are peculiar, and even then they will die occasionally. Be sure that the roots are properly spread out and earth comes in contact up under center of crown roots.

265 Jackmani. Violet-purple, intensely colored, giant blooms — the grandest of all Clematis. Each \$1.00; by mail \$1.25.

266 Crimson Star. Patent Applied For. A large flowering red of the Jackmani type. A truly beautiful flower. Each \$1.00; by mail \$1.25.

Clematis Paniculata

267 Japanese Virgin Bower. Quite different from the above varieties. It blooms in fall with numerous small, white, starlike flowers that are especially fragrant. Very dense foliage. Very hardy and quick grower. Fine for shade. 2-year-old roots. Each 75c; by mail \$1.00.

Honeysuckle, Goldflame

268 Heckrotti. Outside of petal is brilliant flame-pink, while the inside is a creamy golden yellow. They bloom freely from early spring until cut down by heavy frost. Each \$1.00; by mail \$1.25. 3 for \$2.80; by mail \$3.10.

Honeysuckle

269 Halliana. Yellowish white flowers changing to yellow. Very fragrant and free bloomer. Each 50c; by mail 75c. 3 for \$1.35; by mail \$1.65.

Honeysuckle

270 Scarlet Trumpet. Hardy, with trumpet-shaped flowers continuing all summer. Each 60c; by mail 85c. 3 for \$1.65; by mail \$1.90.

Silver Lace Vine

271 Polygonum Baldschuanicum. This is a very popular vine. Is a vigorous grower, attaining height of 10 to 15 feet, producing numerous small creamy white flowers through summer and fall. Very satisfactory. Each 85c; by mail \$1.10.

Wisteria

272 Chinese Purple. Slow-growing, twisting vine with Pea-shaped blossoms. We supply in purple blossoms only. We have the grafted stock which is more sure to bloom. Each 60c; by mail 85c.

Water Lilies

ALL POSTPAID

These Water Lilies are perfectly hardy anywhere in the United States, growing wild as far north as Canada. They commence flowering early in the spring and remain in flower until late summer.

389 **Attraction.** The petals are garnet-red tipped with rose flecked white. Its sepals are almost white with faint rose streaks. As the blossom ages, the color becomes a rich, deep red with garnet-streaked sepals. Its stamens are of a rich mahogany tipped with yellow. Under favorable conditions blooms attain 8 inches across. Each \$2.00.

390 **Comanche.** Flower opens a rich apricot and then changes later to a deep coppery bronze that appears as a glowing red in the depths of the flower in contrast with the orange stamens. Each \$2.00.

391 **Gloriosa.** Brilliant red in color, which deepens with age. Flowers average seven inches in diameter. Does well in a tub garden. Each \$2.00.

392 **Marliac White.** Snowy white petals with bright yellow stamens. Fragrant. Each \$1.25; 3 for \$3.50.

393 **Marliac Pink.** The large pink flowers are borne abundantly the entire season. Each \$1.25; 3 for \$3.50.

394 **Marliac Yellow.** (Chromatella.) Sulphur-yellow in color with broad, curving petals. The leaves are handsomely splotched with maroon. Each \$1.60; 3 for \$4.50.

395 **Morning Glory.** Soft shell-pink, very beautiful. The plant is a good, strong grower. One of the big fellows, the blossoms getting larger as the season advances. Gives an excellent show after most of the other Lilies have stopped blooming. Each \$1.50.

396 **Somptuosa.** Considered one of the most delicate and beautiful of all the pinks. Rather double, almost perfect in form and above the average in size. Each \$1.75.

409 **Permanganate Potassium.** A germ destroyer to use in outdoor pools. ¼ lb. 35c; 1 lb. \$1.00, not postpaid.

IMPORTANT. Pool plants should be kept in water until planted.

Hemerocallis Seed. These are grown by our hybridizer, who has made up this mixture from some of the best newer varieties.

Plant these in late March, April or May. Do not allow the ground to dry out and during the first summer keep covered with muslin cloth, so that the hot sun does not burn them up. Transplant in April of the second year. Some will bloom that year—some not until the third summer, but these gorgeous lilies are worth waiting for. It is best to plant in soil with plenty of humus—mix in sand and leaf mold (no manure). They like sun and air.

Per Pkt. of 100 seeds, 35c.

THE COLORADO SEED CO., Denver, Colorado

Hardy Perennial PHLOX

ALL POSTPAID

PHLOX PANICULATA. Succeeds in almost any soil and blooms through a long season. This new list covers colors which are sure to please.

The best effects to be had with Phlox are produced by planting masses of each color, not less than six and even as many as two dozen or more plants together. For example, a border of Phlox may be planted, beginning with palest pink and shading up to dark cherry, then pure white, and white with a red eye, and more white, then a quantity of red and again white at the end. Our roots are 2 years old, field-grown. Figures at end of description indicate height in inches.

PRICES: Each 40c; 3 for \$1.10; 12 for \$4.00, except when priced otherwise. All postpaid.

Hardy Garden LILIES

ALL POSTPAID
STANDARD LILIES

Stately Lilies are of the easiest culture, and the varieties listed below are all perfectly hardy. After once being planted, they will increase in beauty and size with each succeeding year. Lilies do best in a well drained sandy soil, which should be fairly rich, and the plants should be given plenty of water during periods of drought. In order to grow Lilies to large size, the bulbs should be planted deeply, 6 inches or more, and the soil stirred to double the depth of planting.

Regale

454 Royal Lily. A magnificent Lily; the pure white flowers, heavy with fragrance, and with canary-yellow throat, have an outside pink suffusion. Cover 8 inches. Height 3 to 5 feet. Blooms June, July. Large bulbs, 7 to 8 in. size, each 40c; 3 for \$1.10.

Lily-of-the-Valley

455 These should be in every flower lover's yard. They increase rapidly and care for themselves. The roots for outdoor use can be planted in late fall and early spring. Clumps of Colorado grown roots for 35c; 3 for \$1.00; 6 for \$1.75.

Summer Flowering BULBS

ALL POSTPAID

All the following are not hardy.

These tender bulbs are usually shipped separately from seeds. Much depends on weather conditions and where to be planted.

Amaryllis

Bulbs are ready in winter to June 1st. Do well in pots or open ground; must be taken up in fall.

461 Giant American Hybrids. The new type of large-flowered, in many mixed shades. We cannot distinguish color by the bulbs. Large size bulbs, each 75c; 3 for \$2.00.

462 Standard size bulbs, each 60c; 3 for \$1.50.

Anemone

Windflower. Plant in warm, drained soil. Bulbs

should be soaked in water 8 to 10 hours before planting. Are not hardy in Colorado though make very attractive border plants.

463 Monarch De Caen. Single mixed. Poppy-flowered. 3 for 25c; 85c per doz.; \$6.50 per 100.

Begonias, Tuberous Rooted

In range of color, beautiful form and simple cultural requirements, they are without rival in the world of flowers. Bloom from spring until frost. Are not hardy. Can be grown nicely in pots.

464 Double Camellia. Colors: Pink, White, Yellow, Rose, Orange, Red and Salmon.

465 Single. Giant blossoms. Colors: Yellow, Rose, White, Salmon, Red, Pink, and Orange.

Any of the Above: Each 35c; 3 for \$1.00; \$3.00 per doz.

Double Ruffled Camellia

A new, outstanding Begonia with large flowers in gorgeous color. Colors: white, rose, pink, scarlet, red salmon, apricot, yellow, and salmon.

Double Picotee Camellia

Gorgeous blossoms with dark edges. Colors: dark pink, rose, apricot, salmon and rose.

Prices for above 2—ea. 40c; 3 for \$1.10; 6 for \$2.10; doz. \$4.00.

Caladiums

466 Elephant Ears. Very effective as foliage plants in center of beds. Require plenty of moisture and heat. No blooms. Should be started indoors in March. Standard size, each 25c; 3 for 70c; \$2.50 per doz.

Calla

467 Golden Yellow. Spotted foliage; a beautiful yellow; does well in pots; needs to be seen to be fully appreciated. Average bulbs, each 35c; 3 for \$1.00; 6 for \$1.80.

Gloxinias

468 Are easily grown in pots; may be transplanted to a semi-shady place. Mixed Colors. Each 40c; 3 for \$1.10.

Ismene Calathina

469 Peruvian Daffodil. In our estimation this gorgeous garden subject is too little known and too little appreciated. Large, chaste white blossoms of exquisite fragrance. Blooms six weeks after planting. The flowers resemble clusters of pure white Amaryllis. Each 35c; 3 for \$1.00.

Oxalis

470 Summer Flowering for masses in beds and borders. Pink. Large bulbs. 6 for 15c; 25 for 50c; 100 for \$1.65.

Ranunculus

471 Buttercup. French. Includes a variety of bright and showy colors. Thrive in moist cool soil. Plant 2 inches deep. Not hardy enough to live over winter outdoors in Colorado. 3 for 25c; 75c per doz.; \$6.00 per 100.

Tigridia

472 Tiger or Shell Flower. Suitable for the mixed border, averaging 12 inches high. Gorgeous flowers, scarlet, creamy yellow and rose-carmine, with unique center blotch; the tiger-like colors are handsome. 2 for 25c; doz. \$1.25.

Tuberose Bulbs

Much liked for the very exquisite fragrance and beautiful flowers. For several seasons we have been unable to procure the double blossom stock. This year we are promised a moderate quantity.

473 Double Dwarf Pearl. Each 15c; 12 for \$1.50.

474 Single, Tall Early. We are convinced that the Early Singles will be more popular since they are profuse bloomers. 3 for 30c; 12 for \$1.00.

Superb Exhibition GLADIOLUS

MORE POPULAR THAN EVER—All Postpaid

The Gladiolus are the most attractive and useful cut flower of all the summer flowering bulbs. The long, graceful spikes that carry fifteen to twenty buds may be cut soon as the first flower buds show color; then, if kept in water each successive bud will develop and thus prolong the blooming many days.

The planting season starts in April, and continues until in June, at intervals of two weeks; you thus have flowers from late July until frost time. Best results are obtained in a sunny position and placing the bulbs fully 6 inches deep. Water freely.

A very complete Cultural Leaflet on Gladiolus free with orders upon request. To eliminate aphids and thrip treat with Semesan, Lysol or Corrosive Sublimate, and store with Naphthalene Flakes.

Gladiolus bulbs are usually ready in March, and through April and May into June.

Our stock has all been treated once by the bulb grower before being shipped to us.

6 Bulbs of a kind at the dozen rate.

Dependable Mixed

495 Our Specialty. This is composed of many named varieties where we have surplus and also trial ground lots, all mixed by us. In this you get a wide range of colors, shades and types. It is a very superior mixture. Please do not consider this as common mixture. Per doz. 90c; 25 for \$1.75; 100 for \$5.50.

A Special Good Mixed

496 Made up of good blooming bulbs, especially of stocks where labels are lost, or stocks become mixed. A chance for many good blooms at little cost. 12 bulbs for 80c; 25 for \$1.50; 100 for \$4.50.

SUPERB COLLECTION

18 Choice Named Glad Bulbs

497 No two alike. With directions for culture.

All postpaid for\$1.25

This assortment includes one bulb each of 18 different varieties though not labeled. This Collection is Extraordinary.

Caution

Be sure and treat all Gladiolus bulbs before planting. The past few years there has been great damage caused by Gladiolus thrips. They injure the foliage and unfolded buds so that they do not open. Be on the safe side, whether planting new stock or bulbs saved from previous year, treat the bulbs just before planting. Semesan or Lysol are very effective treatments.

498 SEMESAN. With full directions. 2-oz. pkg. 60c; 1/3-oz. pkg. 20c, postpaid.

499 LYSOL.

Directions: Use one teaspoonful to a quart of water. For large lots, use one pint to 25 gallons water. Heat this solution to about 90 degrees. Put the bulbs (in thin cloth bags) into solution. Let remain for 8 to 10 hours. Solution need not be kept up to 90 degrees, but keep it and the room warm while bulbs are soaking. Do not heat solution hotter than 90 degrees, somewhat less will do, but solution must be warm and room warm to get best results.

Novelties and Specialties for 1951

Why not try some of the new developments in the flowers that have won All-America recognition.

Cuthbertson Sweet Peas

A new strain of Sweet Peas of great vigor, profusion of large, fragrant blossoms, and ability to stand up well in hot weather. For varieties and descriptions, see page 26.

Petunia, Cheerful

778 A new dwarf bedding Petunia, crisp, clear light pink on salmon-pink petals, deeper rose veining toward throat. Plants low growing, forming a mound 10 to 12 inches high, 2 feet across. Pkt. 25c.

Cosmos, Radiance

676 This sensational new Cosmos was awarded a silver medal in the All-America trials and is one of the finest additions to the list of flowers in many years. The plant is compact, erect, with long stems, making it a fine cut flower of a deep rose color with a darker central zone of crimson. Truly an outstanding novelty. Pkt. 15c.

Marigold, Naughty Marietta

725 Burpee's. A new free blooming, dwarf, single French Marigold, with rich golden yellow flowers, blotched maroon at base of petals, 2½ inches across, on compact plants 1 foot high. Pkt. 15c.

Morning Glory, Blue Star

604 All-America Winner. A fine sky-blue color, accentuated by the five deeper blue mid-ribs, forming an attractive star. Earlier than Clarke's Mammoth Blue. Pkt. 25c.

Cosmos, Yellow Flare

677 (Silver Medal Winner, 1942.) At last a yellow Cosmos which will blossom in early summer. Grows 3 to 4 feet tall and blooms freely on long, wiry stems. Excellent for border and as a cut flower. Pkt. 10c.

Petunia, Fire Chief

767 Firecracker-red is the best way we can describe the new All-America winner—Fire Chief Petunia. Winner of All-America Selections' rare Gold Medal, it is a brand-new Petunia color for your 1951 garden. Dwarf, very compact with long blooming season. Pkt. 35c.

Asters

Annual. The queen of the summer-blooming plants. Varieties listed represent the finest Asters of the early (1), midseason (2), and late (3) type. Require a rich soil with ample water, and a sunny exposure.

ASTER WILT

Aster Wilt

The wilt disease of Asters is caused by a parasitic fungus, which may attack the plant at any stage in its growth from the seedling to the seed-producing age. The spores may be carried on the seed, on implements used in preparing the soil and the soil itself. When once introduced into the soil, it persists indefinitely and makes the land "Aster sick."

A wilt-resistant strain of Asters is one which, although planted on the sick soil will withstand the attacks of the fungus and develop into strong, healthy plants, while the non-resistant strains may succumb.

Much disappointment on account of Aster Wilt has been overcome by the use of Wilt-Resistant strains.

Super Giants

(1) This is the largest and most fully double Aster class known. The flowers are from 6 to 8 inches across, with full petaled, graceful, interlacing petals.

Brief Cultural Notes

Zinnias

These are warm weather loving plants and should never be sown until the soil has thoroughly warmed up and all danger of any frost is past. For best results, especially with the smaller flowered, early blooming varieties, we recommend sowing the seed where the plants are to flower. The taller growing, large flowered sorts can safely be transplanted, although they also will make a more robust growth and will produce more flowers if they can be sown where the plants are to bloom, and then when the seedlings are 3 to 4 inches tall, thinned to the proper distance. To induce a thrifty, heavy root system, irrigate your plants rather than sprinkling. Dig a little trench alongside the row and let the water run slowly for quite a while so it will seep down deep into the ground and make the food in the soil available for the plant throughout the mass of feeding roots. Always cultivate after each irrigation to conserve moisture.

Chrysanthemums

Gardeners are coming more and more to grow the early flowered sorts, which can now be had in all colors. Young Chrysanthemum plants bloom better than huge clumps, so divide the clumps of hardy Chrysanthemums each spring, setting small divisions in newly enriched spots in the garden. As the shoots grow 3 or 4 inches tall, pinch out the tops; this will cause them to branch freely. A tablespoonful or two of bone meal dug into the soil about the plants early in the spring will be beneficial. Watering the plants each week with manure water will produce a lusty growth and increase the size of the flowers. Generally Chrysanthemums are troubled with black, brown or purple plant lice, but if they are sprayed with nicotine extract, they will be kept in check and will not become bad pests if one is regular in the work and the spraying is not deferred too long. During the summer the plants need plenty of water and it is wise to syringe the leaves frequently in order to lessen the attacks of red spider, which is an almost microscopic insect, whose injury is evident from leaves turning whitish in appearance.

Select Giant Spencer SWEET PEAS

The Most Popular of All Garden Flowers

By test, our collection of Spencer Sweet Peas (Summer Flowering) contains the best variety in each color classification. These newer varieties insure more plant vigor, more and larger blooms, and a better collection of colors. If given normal care in growing, long, stiff stems will produce four nicely waved and frilled blooms. Sweet Peas should be sown as early as possible in the spring. Sow in furrow 4 to 6 inches deep, covering seed 1 inch, drawing soil to row, filling furrow as the plants grow. Special cultural leaflet free on request.

PINK

846 Charming. Brilliant pink with salmon sheen, often four-flowered.

847 Fluffy Ruffles. Dainty cream-pink with beautiful edges of light cerise.

848 Mary Pickford. Cream-pink suffused with salmon.

849 Mrs. A. Scarles. Bright salmon-cerise with golden orange sheen. Four-flowered.

850 Pinkie. Clear deep rose-pink, with a rare loveliness.

CRIMSON

851 Crimson King. A very true crimson, much admired.

LAVENDER

852 Sweet Lavender. A soft and attractive shade of lavender. Very satisfactory.

WHITE

853 Gigantic. Pure white. Being black-seeded, it germinates readily.

854 Daffodil. Deep cream or primrose with white seed.

855 King White. A very large white. White-seeded.

BLUE

856 The Admiral. Dark navy-blue. Largest and best of this class.

PURPLE

857 Olympia. Best deep rich purple.

MAROON

858 Warrior. The popular mahogany color.

Any of Above: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

Mixed Standard Spencer Sweet Peas

859 Too much cannot be said in praise of the merit of this mixture. Greatest care has been used in blending for this Silver Medal Strain so as to have a complete and well balanced color. You will like it. Pkt. 10c; oz. 15c; 2-oz. pkg. 25c; ¼ lb. 45c; lb. \$1.40.

Special Blend Sweet Peas

860 This mixture is made up of the Late Standard Spencer and the Early Flowering Spencer. A planting of this kind proves most satisfactory for both early and late blooms. Try it. 1-oz. Pkt. 20c; 2-oz. Pkt. 35c; ¼ lb. 60c; lb. \$1.70.

The New Cuthbertson Sweet Peas

A new strain of Sweet Peas extremely vigorous, long-stemmed, with large, wavy, fragrant blossoms. They stand hot weather well and flower two weeks after the Early Flowering Spencers, and ten days before the Standard Giant Spencers.

861 Frank G. Lavender. **862 Lois.** Rose-Pink.

863 Marion. Cream. **864 Janet.** White.

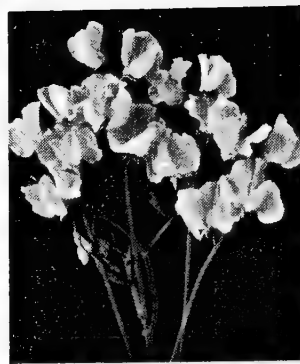

865 Coline. Scarlet.

To Insure Increased Bloom and Early Production

888 Nitragin Bacteria is very beneficial. Be sure to inoculate your seed with it. Does wonders in producing growth and bloom. Small packet (enough for 8 lbs. of seed), only 15c, postpaid.

THE COLORADO SEED CO., Denver, Colorado

VEGETABLE GARDEN SEEDS

ALL GARDEN SEEDS POSTPAID

The Colorado Seed Co. warrants to the extent of the purchase price, that seeds or bulbs sold are as described on the container, within recognized tolerances. Seller gives no other or further warranty, express or implied.

Asparagus

One oz. to 60 ft. of row.

Asparagus is a slow grower, requiring at least three years to mature from seed, and is therefore not generally recommended to the small gardener. Usually, unless you go into Asparagus raising on a large scale, it is better that you get the roots in preference to raising from seed.

Mary Washington Rust-Proof

901 Is green with pinkish tinge at bottom. Our seed is direct from pedigreed stock, which is practically rust-proof. This will eventually supersede all other varieties. Pkt. 10c; oz. 25c; ¼ lb. 70c.

Mary Washington Rust-Proof Roots

902 Doz. 45c; 25 for 75c; 50 for \$1.25; 100 for \$2.00.

New Paradise Roots

903 Produces normal crop one year earlier than other varieties. Large, crisp, tender stalks, with exceptionally fine flavor. Rust resistant. 2-year-old roots. Doz. 60c; 25 for \$1.00; 50 for \$1.75; 100 for \$3.00 postpaid.

Beans—Garden-Dwarf

1 lb. will plant 100 ft., 60 lbs. to an acre.

Bush Beans should be planted about the last of May. The furrows should be at least 2 feet apart. Plant the Beans 4 inches apart in the furrow and cover them with an inch of soil. They come up in from 8 to 10 days and the plants mature in from 6 to 9 weeks. Thorough tilling is essential; the ground must be kept soft. Avoid handling or touching the vines in damp weather.

When bean beetles trouble, pick off all you see, then use Acme Garden Guard. (See page 38).

Nitragin Inoculation Bacteria will increase your Bean crop. Garden size 15c each.

Prices—All the following varieties, unless priced otherwise:

Large Pkt. 10c; ¼ lb. 20c; ½ lb. 30c; 1 lb. 50c.

GREEN PODDED VARIETIES

Tendergreen or Asgrow Stringless 50 days

904 One of the most popular green beans. Plant is medium large erect and very prolific. The pods are nearly straight, dark green, round, meaty and succulent, and entirely stringless.

Burpees Stringless Green Pod 50 days

905 Has always been a favorite and has been improved from year to year. Plant bushy and productive; pods nearly round, slightly curved and stringless.

Bountiful 47 days

906 An early variety with flat, light green pods, stringless when young. A good variety for the garden.

Keystoneian 56 days

907 Bears abundantly, medium rounded, stringless pods.

YELLOW PODDED VARIETIES

Brittle Wax. (Round Podded Kidney Wax)

56 days

908 Plants large and erect. Pods medium yellow, round, slightly curved, brittle, fleshy and stringless. Fine for freezing. The best of the wax beans.

Golden Wax

50 days

909 Plant small but vigorous and good bearer. Pods straight, thick flat, stringless but some fibre.

Pencil Pod Black Wax

55 days

910 A leading wax variety for the home garden. Plant vigorous and productive. Pods round, slightly curved, tender and entirely stringless.

Pole Beans

Prepare the ground for Pole Beans exactly the same as for Bush Beans. The poles should be set up firmly, 3 feet apart, and five beans planted around each pole, 1 inch deep, in a circle.

Kentucky Wonder (Old Homestead) 65 days

911 Early, long round green pods with distinctive flavor. One of the most widely used and best known home garden varieties for cut beans and freezing. It bears over a long period.

Lima Beans

Burpee's Improved Bush Lima 75 days

912 Plant large, vigorous and productive. Pods in clusters of 5 or 6 with large plump beans.

Broccoli

A vegetable very similar to Cauliflower, though much easier of cultivation. Produces bluish green heads in center of plant.

Italian Green Sprouting 70 days

913 The best for Colorado, and is distinct from the old varieties. Pkt. 10c; oz. 50c; ¼ lb. \$1.50.

Beets

The rows in which Beets are planted should be a foot apart. Along each row in a furrow or trench one inch deep, drop the seeds 1 or 2 inches apart; then cover with fine soil, pressing down firm. Beets should be planted some time between the first of April and the first of June; they will be from a week to a month coming up, according to the weather. When the plants are about 4 inches high, thin out to from 3 to 4 inches apart. The plants pulled up can be used for greens. Beets should be ready for eating in from 8 to 12 weeks. Keep the ground loose and well tilled.

Detroit Dark Red

914 We believe this is the best Beet for the market and home garden, and on account of its uniform deep rich color, the most desirable for canning. Roots are medium size, nearly round, very smooth and of dark blood-red color. Very crisp, tender and sweet, remaining so a long time. Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$1.75.

Early Blood Turnip

915 Popular variety for home garden and market. Roots turnip shaped, bright red with zones of lighter shade. Pkt. 10c; oz. 15c; ¼ lb. 45c; lb. \$1.50.

Swiss Chard, Lucullus

916 Leaves crumpled, bright yellowish green; stems thick, broad and pale green. Pkt. 10c; oz. 15c; ¼ lb. 45c; lb. \$1.50.

Burpees Rhubarb Chard

917 A new Swiss Chard that looks like Rhubarb. Delicious flavor—you will like it. Pkt. 10c; oz. 35c; ¼ lb. \$1.00.

Brussels Sprouts

Half Dwarf

918 One ounce will sow a bed 40 square feet and produce about 2000 plants. They are hardy and like miniature cabbages 1 to 1½ inches in diam. growing thick on the stem of the plant. Pkt. 10c; oz. 50c; ¼ lb. \$1.50.

Cabbage

Cabbage requires an abundance of both moisture and tilling. It is also advisable to enrich the ground if possible. It will pay you to set out both early and late varieties. Set early Cabbage 18 inches apart in the rows and 2 feet between rows. Late cabbage 2 ft. apart in the rows and 3 feet between the rows. For early plantings sow the early varieties in hot-beds in February, second early and late crops sow in March and April and transplant in April and May. Late crops can be sowed in the field during April and May.

Copenhagen Market

919 The earliest large, round headed Cabbage. It is very compact in habit and can be planted close. The heads all mature at one time and will stand a good while before bursting. Pkt. 10c; oz. 40c; ¼ lb. \$1.20; lb. \$3.50.

Danish Ball-Head or Short Stem Hollander

920 The best of the late varieties. Head fairly large and solid; texture crisp and of good flavor. Keeps well. Pkt. 10c; oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

Carrot

Furrows for Carrot should be 14 inches apart and from a half inch to an inch deep. The seed can be sown from mid-April to mid-May; it should be sown rather close, as carrots do not germinate very well. Thin the plants out to 4 inches apart. Soil for carrots should be particularly well tilled before they are planted.

Nantes Improved Coreless

921 Bright orange, cylindrical and about 6 inches long. Practically coreless. Excellent for home garden. Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.25.

Oxheart or Guerande

922 Very early; orange, crisp and tender. About 4½ inches. Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.25.

Chantenay, Red Cored

923 A smooth, stump rooted variety about 5 inches long. Reddish orange flesh, with core of nearly same color. A good yielder. Pkt. 10c; oz. 20c; ¼ lb. 65c; lb. \$2.00.

Imperator

924 Smooth deep orange uniformly tapered to a semi-blunt end. Flesh fine grained, tender and of excellent quality. About 8 inches long. Pkt 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$2.00.

Danvers Half Long

925 An old favorite that retains its popularity. Medium size, about 6 inches and heavy yielder. Pkt. 10c; oz. 20c; ¼ lb. 65c; lb. \$2.00.

Cauliflower

All of our Cauliflower seed is growers first quality sifted. The cultivation is the same as that of cabbage, except that Cauliflower favors even a moister soil. Proper tilling and watering affect this very much. Tie the long leaves together when the head is large as a dollar to keep it white. One ounce will produce about 2000 plants.

Early Snowball

926 Positively nothing better for earliness and quality; produces fine white heads. The outer leaves are short, allowing the plants to be set closer together than most varieties, 18 to 20 inches being far enough apart. Pkt. 15c; ¼ oz. 75c; oz. \$2.25.

Celery

For early crop, ready about the middle of July, sow seed indoors or in hot-beds the first week in March. Transplant about May 1st to open ground. Seeding for late crop can be done up to the last of April in cold frames or beds out of doors, transplanting as late as July 18 to 20. Field rows should be 30 to 36 inches apart, plants 8 inches apart in the rows. When plants are nearly mature they can be bleached by wrapping paper around each stalk in the field. If wanted after freezing weather sets in, the stalks should be taken up and placed in a trench, deep enough so that only the top leaves show.

Giant Pascal

1 oz. will produce about 5000 plants.
927 This is the variety that has made Colorado Celery famous and is the standard variety for winter use. Pkt. 10c; ¼ oz. 25c; oz. 75c; ¼ lb. \$2.25.

Chives

928 A member of the Onion family. Hardy. The seed grows readily. A packet makes a suitable home supply. Pkt. 10c; ¼ oz. 30c; oz. 90c.

Collards

Georgia or Southern

929 The standard variety for greens. Pkt. 10c; oz. 15c; ¼ lb. 45c.

Corn, Sweet

Corn should be planted to the north of the garden, so as not to shade the other crops. It needs shallow but continual tilling. Just after the middle of May is a good time to plant. The rows should be 3 feet apart, the kernels sown three together every 6 inches in the furrow. When the Corn is well started, pull out all but the strongest stalk in each group. Keep the little shoots or suckers cut from around the roots. The ears are ready to pick when the silk is brown and the kernels on the top are plump. One lb. will plant 100 hills.

OPEN POLLINATED VARIETIES

Early Golden Bantam

79 days

930 Select strain of exquisite quality; when ready to use is of a bright golden yellow color. It can be planted very early; is hardy. The small stalks grow very closely together in the row, and will produce 2 to 3 eight rowed ears each. We especially recommend it on account of its ability to stand the cold weather of spring. Pkt. 10c; ¼ lb. 15c; ½ lb. 25c; lb. 40c; 5 lbs. \$1.60.

Giant Golden Bantam Improved

931 Is a 12-rowed variety of very sweet corn. A little later than the 8 rowed. Good producer. Pkt. 10c; ¼ lb. 15c; ½ lb. 25c; lb. 40c; 5 lbs. \$1.60.

HYBRID VARIETIES

The result of hybridizing gives us seed that produces very early, deliciously sweet and remarkably uniform ears—just what every home gardener wants. Make two or three plantings, 10 to 14 days apart, then you have Corn through a prolonged period, fresh from your garden to the table.

Golden Cross Bantam Hybrid

932 An improved hybrid. Ears are about 8 inches long, running 10, 12 and 14-rowed. 85 to 88 days. Best for home garden. Pkt. 10c; ¼ lb. 20c; ½ lb. 35c; lb. 60c; 5 lbs. \$2.50.

Extra Early Bancross

933 A very early hybrid, maturing in about 78 days. 12 rowed and very dwarf. Pkt. 10c; ¼ lb. 20c; ½ lb. 35c; lb. 60c; 5 lbs. \$2.50.

Cress

Curled or Pepper Grass

934 Used in salads and for garnishing—has a pleasant pungent flavor. Pkt. 10c; oz. 35c.

Cucumbers

Dig holes at least 5 feet apart. They should be a foot wide and 5 or 6 inches deep. Fill each hole to within an inch of the top with equal parts of sand and well rotted stable manure thoroughly mixed. Scatter at least 10 seeds in it, well apart, and cover them with half an inch of fine soil, pressing it down. From the middle to last of May is planting time. Thin out to 3 plants to a hill. 1 oz. will plant 50 hills.

Use Semesan on your Cucumber seed to increase germination and prevent leaf blight.

Hotkaps are excellent protectors from late frosts. Have them ready for your cucumbers.

Clark's Special Deep Green

935 This strain is the result of years of selection. Averages 8 to 10 inches long, which is a good marketable size. Being very dark green skinned, and white inside, with uniform shape, it is very popular. We heartily recommend it. Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.25.

The Colorado

936 A white spined variety of the long type, averaging 10 inches long, straight and symmetrical. A dark green color almost to the tip end. A good producer with small seed cavity. Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.25.

Improved Long Green

937 The standard green, very prolific. Pkt. 10c; oz. 20c; ¼ lb. 65c; lb. \$2.00.

Straight Eight

938 Averages 8 inches long. Uniformly cylindrical. Medium green color. Desirable for home and market. Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.25.

National Pickle

939 Smaller than the old popular Chicago Pickle and more productive. Actually the best small pickle Cucumber on the market. Pkt. 10c; oz. 20c; ¼ lb. 65c; lb. \$2.00.

Egg Plant

Sow in hot beds very early in the spring; thin them out as soon as big enough to be handled, to 3 or 4 inches each way, and transplant 2 or 3 feet apart in very rich warm ground. Do not plant them outside till nights are real warm. Hoe often and hill up gradually till they blossom.

Improved Large Purple Spineless

940 This variety has superseded all others both for market and home garden; it is by far the best variety, the fruits of largest size and perfect form, eight or ten on a plant. Our stock is extra selected from the best grower in New Jersey. Pkt. 10c; ¼ oz. 20c; oz. 50c.

Endive

Culture similar to Lettuce. Used in salads and for garnishing. One ounce will sow 100 feet.

Green Curled

941 Plant is 16 inches across, medium green, deeply cut and fringed. Leaves can be tied up for blanching. Pkt. 10c; oz. 20c; ¼ lb. 50c.

Broad-Leaved Batavian

942 Plant is 12 inches across, deep green, slightly crumpled, with close bunched center leaves producing a well blanched heart. Pkt. 10c; oz. 20c; ¼ lb. 60c.

Kale or Borecole

A hardy, non-heading variety of the Cabbage family, used extensively for greens. It is extremely high in vitamin content. The leaves are especially tender and delicious after exposure to light frosts. One ounce will produce about 2000 plants.

Dwarf Green

943 Curled leaf and best flavor. Pkt. 10c; oz. 20c; ¼ lb. 60c.

Kohl Rabi

A member of the Cabbage family, grown for its turnip flavored, bulb like swollen stem which forms above ground.

Early White Vienna

944 Flesh is mild, tender, fine textured and of excellent flavor. The most popular variety. Pkt. 10c; oz. 40c; ¼ lb. \$1.20.

Leek

Closely related to the Onion, but with flattened leaves, and milder flavored swollen stems instead of bulbs.

Large American Flag

945 An early popular sort. Stems 8 to 10 inches long, thick, white and attractive. Pkt. 10c; oz. 40c; ¼ lb. \$1.25.

Lettuce

Lettuce will stand light frosts, and is therefore one of the first things to plant; if the ground is well prepared, early April is not too soon. It can be planted up to the middle of July, and many prefer the later plantings. Place seed in trench half an inch deep, cover with fine soil to top of the trench and press the soil down. The plants should be up in about a week. If head varieties are wanted, thin to 4 or 5 inches. The heads are usually well formed in 10 weeks and should then be cut or they will rapidly go to seed, especially in hot weather. The rows of Lettuce should be at least a foot apart. The quality of the Lettuce depends on the tilling—keep the hoe busy. One ounce plants 200 feet of row.

New York or Wonderful

946 Also called Mountain Iceberg and Los Angeles Market.

This grand Lettuce we believe to be the finest in cultivation. A wonderful heat resisting Lettuce and slow to run to seed; mammoth heads, like small Cabbages; bright green. Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.25.

Wonderful No. 515

947 An excellent heat-resisting variety of the New York type. Head medium large, attractive, well rounded, solid and crisp. Pkt. 10c; oz. 30c; ¼ lb. 90c; lb. \$2.75.

Early Mountain Iceberg No. 12

948 A strain of the New York or Wonderful that is earliest of all head varieties, thus especially suited for growing in high altitudes. Produces a good average of large, round, solid heads. Resists hot weather and ready for market in 60 or 70 days. Big Lettuce growers use this now extensively. Pkt. 10c; oz. 30c; ¼ lb. 90c; lb. \$2.75.

Mignonette

949 A curly, crisp, small heading variety. Leaves much crumpled with brownish tinge, forming a small but compact hard head. Has a well blanched, white heart. Of excellent quality for home garden. Pkt. 10c; oz. 30c; ¼ lb. 90c; lb. \$2.75.

Oak Leaf

950 An early dark green leaf Lettuce. Leaves are thick, smooth, but deeply lobed, resembling oak leaves. Pkt. 10c; oz. 30c; ¼ lb. 90c; lb. \$2.75.

Grand Rapids

951 A popular leaf Lettuce that forces well and is crisp and tender. Pkt. 10c; oz. 20c; ¼ lb. 65c; lb. \$2.00.

Simpson's Early Curled

952 Probably the most widely used of all leaf varieties for the home garden. Early, hardy and dependable. Loose leaved, forming a compact central bunch. Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$1.80.

Prizehead

953 Not a true heading variety, but a fine loose leaf sort. Leaves are curled and frilled, edged brown. Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$1.80.

Musk Melon

Muskmelon planting and cultivation throughout are the same as those used in raising Cucumbers. Are considered rather delicate for northern lati-

tudes, but with care can be successfully grown. Starting the plants in pots or small Strawberry boxes indoors, and then setting out after frost is over, gives early protection. The pleasure of raising them is worth the effort. One ounce plants 50 hills.

Hales Best

954 This early strain is now acknowledged by the leading Rocky Ford growers to be the most profitable. Its earliness puts it ahead, and its firm flesh makes it an excellent shipper. Salmon color, slightly oblong, deeply netted. Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$1.80.

Greeley Wonder

955 The most satisfactory of the true Muskmelons. Especially suited for home use. Salmon color, thick, sweet flesh. Pkt. 10c; oz. 25c; ¼ lb. 80c; lb. \$2.50.

Honey Dew

956 Originated at Rocky Ford. Green flesh and light cream colored skin; a long keeper, in fact ripens after being removed from the vine. Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.25.

Watermelons

Watermelon culture is the same as that of the cucumber, but hills should be 8 to 10 feet apart. One ounce will plant 20 hills.

Kleckley's Sweet or Monte Cristo

957 Often called Rocky Ford, the sweetest of the large Watermelons. Its fine quality makes it a most desirable variety for home use and nearby markets. Fruits are of large size, oblong in form, skin dark green, rind very thin; flesh bright scarlet with broad, solid heart, crisp and sugary. Pkt. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

Stone Mountain or Dixie Belle

958 Large, nearly round. Size is between all round and long types. Dark green with scarlet flesh. Pkt. 10c; oz. 15c; ¼ lb. 45c; lb. \$1.25.

Mustard

Used as greens and also in salads. Liked for its sweet, pungent taste. One ounce per 50 feet of drill.

Southern Chinese Giant Curled

959 The earliest and most popular sort. Leaves long and wide, light green, tinged with yellow, heavily crumpled at edges. Pkt. 10c; oz. 15c; ¼ lb. 45c.

Mustard Spinach

960 A quick growing variety with thick smooth leaves. Combines flavor of Mustard and Spinach. Pkt. 10c; oz. 15c; ¼ lb. 45c.

Onion

Sow the seed as soon as the frost is out of the ground. The rows should be 2 feet apart, the furrows half an inch deep. Sow the seed close, pressing the soil down firmly on them. Thin the plants out to 3 inches apart. One ounce for 100 feet of row; 4 to 5 lbs. per acre.

Danvers Yellow Globe

961 A standard yellow, being the popular strain for Colorado markets. Pkt. 10c; oz. 30c; ¼ lb. 90c; lb. \$2.85.

We Pay Postage on All Seeds Priced on This Page

Yellow Sweet Spanish

962 An American grown strain of the famous Spanish variety called Valencia. Our seed is direct from the grower in California. Is bronzy color skin, white inside, large oval shape. A big producer when started early. Does well in Colorado. Pkt. 10c; oz. 45c; ¼ lb. \$1.35; lb. \$4.00.

White Sweet Spanish

963 Originated from the Yellow Valencia and now has become very popular; however the true seed is not plentiful. We have of the pure stock. Pkt. 10c; oz. 45c; ¼ lb. \$1.35; lb. \$4.00.

Bunching Onion

964 This long white variety takes the place of the old White Lisbon. Is hardy and does not make a large bulb. Pkt. 10c; oz. 40c; ¼ lb. \$1.25; lb. \$3.75.

Onion Sets

Our Onion Sets are Colorado grown, which are solid, and are far superior to Eastern grown sets. A pound about one quart, plants about 20 feet of row; 12 to 15 Bushels will plant an acre. Sets will produce good green Onions much quicker than from seed and will also make large Onions three to four weeks earlier. Usually have only yellow and white. 965 Either color, per quart 35c; 3 quarts for \$1.00 postpaid.

Larger quantities quoted on application.

Onion Plants

We specialize in Texas grown.

By using these young Onion plants you gain several weeks over the time for seed to produce young Onions for the table, or make large Onions. They are of the true Bermuda Onion variety, which is mild and sweet.

They are started in Texas, are ready in February to May. You should place your order in advance. March is when we have our main supply. Put up approximately 100 in a bunch. Crystal Wax, White Bermuda. The most popular variety for early flat Onions.

Yellow Bermuda. Globe shaped. Late. Good keeper.

966 Either variety. Per bunch 35c; 3 bunches for \$1.00; 10 bunches for \$2.50, postpaid. 60 bunches in a crate—quoted on application.

Parsley

Parsley seeds are sown in a drill in the spring. The plants die down in the fall but if protected with mulch will put out fresh foliage the next spring. Should be replanted every two years.

Champion Moss Curled

967 Very thickly curled and mosslike. We consider this the best variety for home and market garden. Pkt. 10c; oz. 15c; ¼ lb. 45c.

Parsnip

General culture for Parsnips is the same as for Beets, except a light or slightly sandy soil is best. May be left in ground throughout the winter. One ounce will plant 100 feet of row.

Hollow Crown

968 This is the thick-shouldered type and is the best variety in cultivation; roots medium long, white, smooth, tender, sugary and of excellent flavor. Pkt. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.20.

We Pay Postage on All Seeds Priced on This Page

Garden Peas

The furrow for Peas should be 4 inches deep. Sow the seeds 1 inch apart and cover with 1 inch of fine soil, thus leaving part of the furrow unfilled above them. This is to be filled gradually with fine soil as plants grow until the furrow is filled level with the ground. By this method, the sun can warm through the soil to the roots. Peas can be planted as soon as the frost is out of the ground. The rows should be 2½ feet apart. One pound will sow 50 feet.

We pay postage on Peas at these prices:

Pkt. 10c; ¼ lb. 15c; ½ lb. 25c; 1 lb. 45c.

Dwarf Telephone

75 days

969 The Mountain Telephone variety. Large pods, fine standard sort. Really the best variety for this western country. Contains 8 to 10 Peas of excellent quality.

Alaska

57 days

970 Extra early and very hardy, smooth and good quality.

Laxton's Progress

62 days

971 The earliest and by far the best of the large-podded wrinkled Peas. Of all the varieties producing Peas of equal quality, this is the heaviest yielding.

Little Marvel

63 days

972 Very dwarf, tender and sweet. Best of the early dwarf wrinkled class.

Pepper

Peppers, like Tomatoes, should be planted in a window garden about the first of March. They are grown and transplanted exactly like Tomatoes, but the plants can be placed nearer one another in the ground, say 2 feet apart in rows 2½ feet apart. One ounce will produce about 1500 plants.

California Wonder

973 Plant vigorous, upright and prolific. Very attractive fruit, uniform, and deep green changing to bright crimson. Flesh very thick, sweet and mild. Pkt. 10c; ¼ oz. 20c; oz. 75c; ¼ lb. \$2.25.

Ruby Giant

974 Of stocky growth, very vigorous, well branched and thickly set with enormous fruit, much larger than the well known Ruby King. The flesh is extremely mild and very thick. For salads it is unsurpassed sliced; of mild flavor. Pkt. 10c; ¼ oz. 20c; oz. 60c; ¼ lb. \$1.80.

Pumpkin

The culture of Pumpkins is similar to Winter Squash. One ounce for 20 hills; three pounds per acre.

Small Sugar or Pie

975 A small Pumpkin, being about 8 inches in diameter. Deep orange-yellow skin and fine grained flesh. Prolific and in every way desirable. The average weight is about 5 pounds. This is the variety the famous Pumpkin pies are made of. There is nothing better than a good slice of juicy Pumpkin pie. Pkt. 10c; oz. 15c; ¼ lb. 50c; lb. \$1.50.

Radish

Radishes can be planted very early—as soon as the ground can be worked and no danger of frost. The rows should be from 8 inches to a foot apart, the furrows for the seeds about half an inch deep; and the seeds, when dropped in the furrow, about an inch apart. Press fine soil down over them to the depth of the furrow. As the plants grow, thin them out like beets. Radishes mature, depending on the kind, in from 4 to 6 weeks. The turnip shaped ones are the earlier. One ounce will plant 100 ft. of row.

All varieties: Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00:

Vick's Early Scarlet Globe

976 One of the best for forcing, being globe-shaped, bright scarlet-red. Growers who force under glass should plant liberally of this stock, averaging your plantings 10 to 12 days apart.

Crimson Giant

977 Root large, globular 1 inch to 1½ inches in diameter deep crimson outside. The white flesh holds its firmness well.

Early Scarlet Turnip

978 Top small, root round, 1 inch in diameter. Dark scarlet-red with firm white flesh.

Early Scarlet Turnip White Tip

979 Root round, smooth, dull scarlet-red, one-third white at bottom.

French Breakfast

980 Extremely early. A medium sized Radish, olive-shaped, small top, of quick growth, very crisp and tender. Of a beautiful scarlet color, except near the tip, which is pure white.

Icicle

981 The finest white variety and the earliest of the long, snowy white sorts yet produced. It has but few tops, making it very desirable for forcing. The roots continue brittle, mild and crisp, until full grown, with a delicious freshness not found in other sorts. Rapid growing, tender, with a delicate fine grain. Finest for market or home use.

Rutabaga

Often known as Swedish Turnips. Can be successfully grown almost anywhere and should be more extensively cultivated. Excellent table food and great stock food. Keep in cellar all winter. One ounce to 150 feet of row.

Purple Top Yellow

982 Danish stock seed, which is superior to American grown. Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

Salsify

Easily cultivated, stays in ground over winter. Used as a creamed vegetable and in flavoring soups. One ounce will sow 40 feet of drill.

Mammoth Sandwich Island

983 Largest and best sort. Pkt. 10c; oz. 30c; ¼ lb. 90c; lb. \$2.80.

Spinach

It is best to sow Spinach as early in the spring as possible without danger of hard frost, because if it is not cut before the hot weather it will toughen and spoil. It should be planted in fertile soil. One ounce will plant 50 ft. of row.

Giant Nobel or Gaudry

984 A very desirable new thick-leaved, dark green variety, that produces a large crop of enormous size leaves. Ready for market in 45 days. Pkt. 10c; ¼ lb. 20c; lb. 60c.

Bloomsdale or Savoy-leaved

985 A long standing type with crumpled savoy leaves. Just what is wanted in our market. Ships well and keeps long. Is considered the best all round variety. Pkt. 10c; ¼ lb. 20c; lb. 60c.

New Zealand

986 Unlike other Spinach, it grows tall and produces branches which are edible throughout the summer. Especially for the home garden. Plant the seed in hills 6 to 8 inches apart. Pkt. 10c; oz. 20c; ¼ lb. 60c.

Mustard Spinach

987 A quick growing, tender Mustard with Spinach flavor. Pkt. 10c; oz. 15c; ¼ lb. 45c.

Squash

Do not plant until all danger of frost is over. The bush varieties can be planted 5 feet apart, but the running varieties should be 8 to 10 feet apart. Watch for squash bugs. Use Botano dust at first sign of them.

Early Yellow Summer Crookneck

988 A favorite in both home and market gardens. Fruit is long, of bright orange color. Rich and buttery. Very productive. Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.50.

Yellow Bush Straightneck

989 Early, prolific. A very popular summer variety, 8 to 10 inches long by 2½ inches in diameter. Delicate lemon-cream color. Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.50.

White Bush Scalloped (Patty Pan)

990 An old favorite. Fruits pale green when young, becoming white as they grow. They weigh up to 2½ lbs. Shaped somewhat like a round pie. Pkt. 10c; oz. 15c; ¼ lb. 45c; lb. \$1.25.

Zucchini

991 A well known Italian Marrow type. Fruits very nearly cylindrical and straight. Color medium green, mottled with creamy-gray and lighter green lace pattern; flesh very firm and of delicate flavor; length 12 inches, diameter 4 inches. Matures in about 50 days. Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.50.

Hubbard

992 Our own strain of Hubbard Squash is considered to be of the finest. The fruit grown from our seed matures early, keeps well and commands a high price. The shell is hard, thickly covered with rough warty growth. Flesh bright orange-yellow, fine grained, very dry, sweet and rich. Pkt. 10c; oz. 20c; ¼ lb. 65c; lb. \$2.00.

We Pay Postage on All Seeds Priced on This Page

Uconn (All-America Gold Winner)

993 A Table Queen type but set on a bush plant. Fruit dark green with slight flaking. Fine flavor. Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.25.

Table Queen or Acorn

994 Oval fruit, dark green, 1¼ to 1¾ pounds. Flesh light yellow—bakes well, with sweet inviting flavor. Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$1.80.

Tomato

Tomatoes are planted indoors in a window garden about the first of March. When the third leaf of a plant has formed, put the plant into a 3-inch pot or band. After all danger of frost is over, the plants may be set out in the open ground. Do not plant Tomatoes within 3 feet of any other crop. Dig holes 3 feet apart and deep enough to allow placing the plant an inch or two deeper than it was in the pot. Cover the top of the pot with your fingers, holding the plant between them; then turn the pot upside down, tapping it with a trowel or other tool, when the plant will easily come out. Place it in the ground, pressing the earth around it; if the earth is dry, water it as soon as the plants are set. Some people put a ring of heavy paper around the plant, at the top of the soil, to keep off cutworms. June 1st is the usual time for transplanting. Tie the growing plants to stakes. One oz. will make about 1500 plants.

Marglobe

80 days

995 A variety brought to popularity by seed distributed from Washington. Is bright red and very round. Slightly later than Earliana but larger. The bearing season is long, thus especially suitable for home gardens. Much liked by canners. A truly wilt-resistant variety. Pkt. 10c; oz. 50c; ¼ lb. \$1.50.

Marglobe—Certified Stock

996 This strain comes to us from a Tomato specialist, who assures us it is reasonably free from wilt, black spot and root rot. We recommend the seed. In 1-oz. sealed packages for 75c each.

Earliana

70 days

997 Selected strain, red, very early and bears freely. Pkt. 10c; oz. 60c; ¼ lb. \$1.80.

Burpees Jubilee

998 The best yellow variety, being a bright golden orange. Very high in Vitamins A and C. Pkt. 15c; ¼ oz. 35c; oz. \$1.00.

Yellow Pear

999 Small yellow pear shaped used mostly for preserving. Pkt. 10c; ¼ oz. 30c.

Turnips

Plant Turnips between the first of May and the last of July, in rows a foot apart. A quarter inch of soil is enough to cover the seed. The plants should be thinned out to about 5 inches apart. Late Turnips are generally considered the best. They should be taken out before the first heavy frost, in the fall, and can be packed in boxes of sand to keep all winter. One ounce for 150-foot row.

Purple Top Strap Leaf

1000 The demand for this popular variety is always great, and we take special care to secure extra selected seed from the most carefully grown stock. It is one of the best Turnips on the market. Has a bright purple top, white underneath. Leaves are short, narrow and erect. Flesh white, fine grained, and of mild, pleasant flavor. Matures in 8 to 9 weeks. Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

Purple Top White Globe

1000A Much larger than Purple Top Strap Leaf. A little later and a much better producer. Much liked in Denver market. Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

Vegetable Roots

902 ASPARAGUS, Mary Washington Rust-Proof. Select roots. Doz. 45c; 100 for \$2.00, postpaid. 1000 roots, not postpaid, \$15.00.

903 ASPARAGUS, New Paradise Rust-Resistant. Doz. 60c; 25 for \$1.00; 50 for \$1.75; 100 for \$3.00, postpaid.

1003 GARLIC BULBS. Can be divided. ¼ lb. 20c; 1 lb. 60c; 2 lbs. \$1.15, all postpaid.

1004 HOPSERADISH. 12 roots 50c; 100 for \$2.50, postpaid.

NEW RHUBARB

1005 CHIPMAN CANADA RED. Bright red all way through. Extra large, of fine flavor. Grows vigorously, extra hardy, practically everbearing. This is the best for our Western gardens. Each 40c; 3 for \$1.10; 12 for \$3.00, postpaid.

1006 RHUBARB or PIEPLANT. Common. 20c each; 3 for 50c; 12 for \$1.80, postpaid.

SEEDS FOR EVERY LAWN REQUIREMENT

About Lawns A good lawn is, without doubt, one of the important features of the home grounds or of any landscape design. It should be remembered when considering a new lawn that the cost of the seed is only a very small part of the actual investment. The labor cost is the greatest. It is thus no economy to save a few cents by buying seed of a questionable quality, only to realize the added expense in years to come of repatching and doing the lawn over and over again. We take pleasure in recommending our grades of Kentucky Blue Grass, which are the best obtainable.

For special purposes and certain locations we have made up mixtures which we feel very suitable. When you are in doubt about what seed is most suited for your particular purpose, please write us. Our leaflets give much information.

SPECIAL LEAFLETS. Each free for the asking.

Singing Canaries

American Raised

Our Canaries are all strong and active. Each bird is tested for song before offering to the public. We cannot send out birds on trial nor will we exchange birds. If ordered by mail, we will endeavor to make the best selection possible. We prefer customers to visit our store and personally select a singer.

Best singers are available during November and December. Young birds have then a more developed song.

Birds must be shipped by express collect. If express office is different than your post office, please inform us. Remittance must accompany order. No C.O.D. orders.

Hartz Mountain Canaries

These are the popular singers and usually are mixed in plumage. Considered the most vigorous. **1375 "XX" GRADE.** A reasonably good song, though not great variety in notes. \$12.00.

1376 "XXX" GRADE. Extra good in all respects, usually yellow plumage. \$14.00.

American Radio Warblers

These are available at certain times. Write for prices.

Female Birds for Breeding

1377 Female birds are usually available January to May. Mixed Plumage. Each \$2.00. Yellow, Each \$2.50.

PARRAKEETS

These attractive birds are a pleasure to have in your home. Select healthy stock generally available in the fall and winter.

1378 Green, Yellow, Blue Plumage. Any color. \$12.00 per pair.

(We cannot ship Parrakeets outside of Colorado.)

We Do Not Handle Any Other Kinds of Birds.

PARCEL POST INFORMATION

We pay postage on all Vegetable and Flower Seeds, except where quoted otherwise. We do not pay postage on Grass, Grain or Field Seeds, unless stated otherwise. We do not pay postage on Poultry Foods and Supplies nor Garden Tools, Sprayers, etc., unless so stated.

THE PARCEL POST rates are as follows: Owing to the convenience of having mail brought to your door by rural delivery system, it is well to take advantage of the low rates.

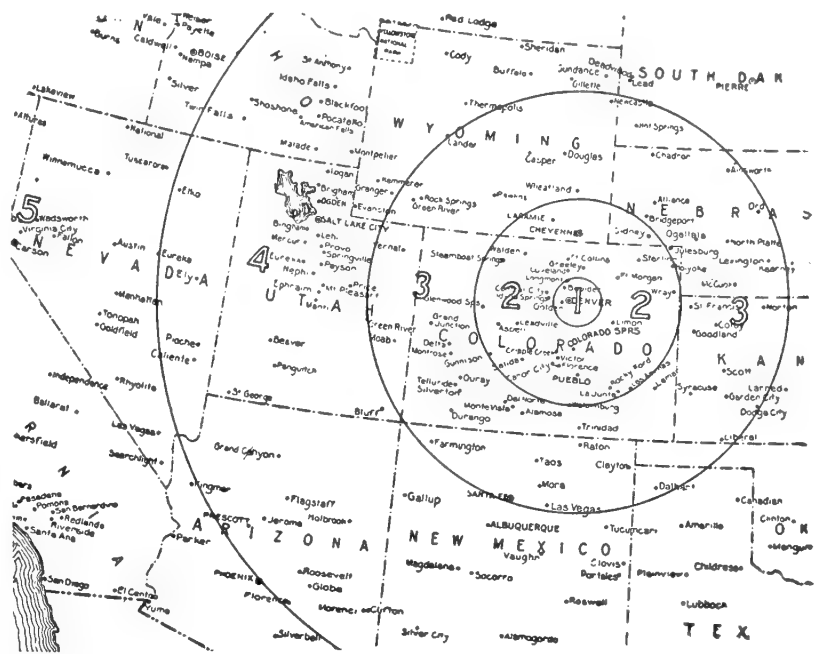

10 pounds anywhere within the city limits of Denver for 19c.

20 pounds one hundred and fifty miles, 51c; and 2c for each additional pound up to 70 pounds.

ZONE RATES—When it is required that postage be added to the purchase price of any commodity, note the distance you are from Denver, see in which Zone you live. It is then easy to estimate the exact amount of postage required, or ask your postmaster.

FOR PARCELS WEIGHING eight ounces OR LESS, containing seeds, bulbs or books only, the rate of postage to all zones is 1½ cents for two ounces or fraction. (Over eight ounces the parcel post rates apply).

When computing the cost of articles by Parcel Post, please consult this schedule:

PARCEL POST RULES AND WEIGHTS FROM DENVER

	5 lbs.	10 lbs.	15 lbs.	20 lbs.

THIRD ZONE—Within 150-300 miles of Denver25	.40	.54	.68
FOURTH ZONE—Within 300-600 miles of Denver.....	.32	.55	.76	.97

Weight Limit—The weight limit is 70 pounds for all zones, and the limit of size is 100 inches in length and girth combined, for all zones.

C.O.D. fee of 20 cents for collections of \$2.50 or less; 25 cents for collections not to exceed \$5.00; 35 cents for collections not to exceed \$25.00; 45 cents for collections not to exceed \$50.00; 55 cents for less than \$100.00. See terms of sales below.

ORDERING SUGGESTIONS

An order blank and envelope are enclosed for your convenience.

POSTAGE. Prepaid on all Vegetable and Flower Seeds, Bulbs, Plants, etc., unless otherwise stated. For Grass, Grain, and Field Seeds and other goods not priced "postpaid," add postage to price. See parcel post rates above.

TERMS. Cash with order. Post Office Money Order, Express Order or Exchange on Denver; small amounts may be sent in clean postage stamps. Please do not ask us to ship C.O.D. unless you remit one-third of the order.

ORDER EARLY. We appreciate your order EARLY and will do our best to complete it at a suitable planting time. Use our order blank and for general correspondence we would like it on another sheet from the order.

ERRORS. Write us at once in full that we may make the adjustment to your entire satisfaction.

NON-WARRANTY. While we take all the care possible in selecting our seeds, shrubs, bulbs, and plants, and we believe they will give satisfaction, we cannot guarantee them. All gardeners of

experience know that success, even with the seeds of the quality of our Dependable Grade depends largely on weather conditions and proper cultivation, thus in common with all of the American Seed Trade Association, we, therefore, give the following warranty. "The Colorado Seed Company warrants to the extent of the purchase price, that seeds or bulbs sold are as described on the container with-in recognized tolerances. Seller gives no other or further warranty, express or implied." If the purchaser does not accept the goods on these terms they are at once to be returned in the original, unbroken package and the purchase price will be refunded. If the seeds do not prove as represented by us we will replace with more or other seeds of same value.

Colorado Customers please add Sales Tax, except on seeds.

DOUBLE-DIVIDEND **SMALL FRUITS** ALL POSTPAID

USEFUL—ORNAMENTAL—Enjoy fresh sun-ripened fruit from your own garden. Very ornamental in the garden landscape. Descriptions and prices below. These varieties are all of established merit and very suitable for our Western planters. Our stock is all examined by State Inspectors.

STRAWBERRIES

The following Everbearing varieties have proven to be best for the home garden. Plants should be set not closer than 1 foot apart in the row and rows 18 inches to 2 feet apart. Set the plant with the crown at the surface of the ground. Water thoroughly after planting.

MASTODON—A very popular Everbearing variety. The berries are very large, firm and uniformly well colored. 25 plants for \$1.00; 100 plants for \$3.00, all postpaid. 1000 for \$23.00, not prepaid.

THE NEW "GEM"—A large round Everbearing variety that is much admired for its uniformity in color, size, and productiveness. Is earlier than Mastodon. 25 plants for \$1.00; 100 plants for \$3.00, all postpaid. 1000 for \$23.00, not prepaid.

STREAMLINER—Everbearing. This new variety has given general satisfaction. It is very sweet and generally produces fruit straight through the season, making it an outstanding everbearer. 25 plants for \$1.50; 50 plants for \$2.75; 100 plants for \$5.00.

RASPBERRIES

INDIAN SUMMER—New Everbearing. The large, glossy red berries are conical shape, have excellent flavor and wonderful keeping qualities. Very select, grown in Colorado. 10 for \$2.00; 20 for \$3.60; 100 for \$15.00.

ST. REGIS EVERBEARING—Produces beautiful red berries from June into September; a truly early and late variety. 10 for \$1.80; 20 for \$2.80; 100 for \$12.00.

CUMBERLAND—The largest Black Raspberry. Very prolific and ripens early. 10 for \$1.50; 20 for \$2.50; 100 for \$11.00.

CURRENTS (2-Year-Old Plants)

PERFECTION—Very large; best red Currant on market. Each 35c; 3 for \$1.00; 10 for \$3.00.

GRAPES

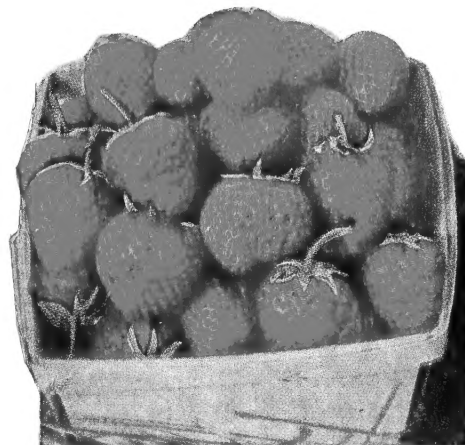

Grape culture in Colorado invites more attention than has been given. The following hardy varieties do well, especially on the south and east slopes of our hillsides.

CACO—One of the best of the amber-red varieties; flesh tender and juicy; more prolific than Concord. Each 50c; 5 for \$2.25; 10 for \$4.00.

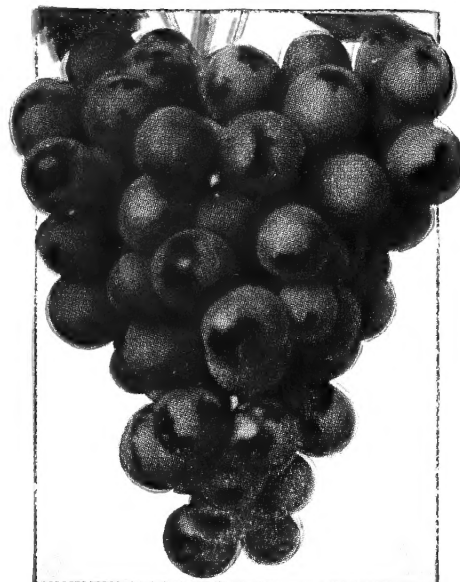

CONCORD—Standard black; very hardy; very suitable for Colorado. Illustrated at right. Each 35c; 5 for \$1.40; 10 for \$2.60; 25 for \$6.25.

PORTLAND—A beautiful white, very regular producer and earlier than Niagara. Each 50c; 5 for \$2.25; 10 for \$4.00.

SHERIDAN—Large blue-black; very sweet and delicious. Heaviest bearer of all Grapes. Late. Each 50c; 5 for \$2.25; 10 for \$4.00.

We cannot be responsible for Strawberry plants after they leave us in good condition. We consider it not advisable to ship Strawberry plants further than third zone (150 to 300 miles) from Denver.
